SAFETY SCAVENGER HUNT

TEK OBJECTIVE: Phys 1(A) demonstrate safe practices during laboratory and field investigations

Directions: Decipher the clues below and go to the safety related item in the classroom described. On a piece of paper attached to each safety related item a word is written. Write down the word in the blank provided next to the corresponding clue. These words unscrambled form a safety slogan in the cryptogram on the back of this sheet.

- The first two teams of two to find all 10 clues and the safety slogan will have 2 bonus points.

- _____ Hydrochloric acid splashed into my eye.
Quick: Where must I fly?
Where does safety lie?
- _____ A student has gone berserk.
We need to call an office clerk.
Where does the call button lurk?
- _____ Enclosed here these items lie,
Irradiated to avoid "pink eye"
And other bacteria that may cause to cry.
- _____ Flowing through this gas main,
I may find methane, propane, or butane.
- _____ A gas and electric fire was started by a total clown.
Right away we need a total shutdown.
Where can shut down be found?
- _____ Pull pin.
Aim at Base.
Squeeze handle.
Sweep from side-to-side.
- _____ In a science lab of these you need two
If to O.S.H.A. we want to be faithful and true
In case during a fire one is blocked and you can't get through.

8. _____ OMG my clothes have caught fire.
So before the flames consume me entire
Throw this over me or my future is dire!
9. _____ Ouch! I slashed my hand.
Just a small cut for a sticky band
Relief's behind the Flag of Switzerland.
10. _____ If a chemical on your arms and legs did splash
Run and get under this in a dash
and yank quickly to wash away a future rash
